Day of Service

continued from page 12

Maryland. "It was one of the most rewarding days of our business. I talked with the students before the project began to let them know that just one person can make a difference

in the world, and, when we all come together for a cause, we can change the world to make it even better."

The PLANET Day of Service helps to raise awareness about the green industry in hundreds of communities around the country. It shows that participating companies not only are

stewards of the environment, but also are good citizens and are willing to give back to their communities. Start planning now for next April when the momentum generated by this Day of Service carries over and generates even more enthusiasm and hope. ☺
